

Hi David [and Anne]---Re- Growing Tomatoes----my tips are probably well known but thought I would forward them to you anyway.

1. Soil ---plant in prepared soil to which compost and sheep manure have been added.

2. Plant seedlings--- water in and add mulch .

3. Keep young plants well watered + give them a feed of "Worm Juice " each week.

. ---Looking forward to learning about other hints /tips in fact anything to do with Home Grown Tomatoes--Just Delicious !

Thanks U3A---- Rhonda Allardice
