

Paper Towel Germination Method

From John Hastings

1. Storing the tomato seeds

If you have particular tomato that you like, here is how you can propagate from that tomato using the paper towel germination method.

Write the name of the tomato type on a corner of the paper towel

Gently place the seeds from the tomatoes on a paper towel – well spaced

Store in a place where they can dry out keep out of sunlight and reseal the bag

2. Growing the tomato seeds

When ready to plant –

Place individually in a punnet

Or place straight into the ground gently putting a layer of soil over the seeds and paper.

Too Easy!
